

The strength to exceed expectations

In 2003, the world's eyes were upon one team – Alinghi won the legendary America's Cup, proving that a common vision can provide the inspiration for the highest achievements.

Franke shares the same reputation as a global leader in uncompromising design, quality and innovative strength, which is why we will be supporting Alinghi as the America's Cup defender in 2007 in Valencia.

Inspired by the Alinghi myth, we have taken our exclusive range of sinks to a new peak of performance – Franke Mythos. Surrender to the fascinating appeal of superlative design in stainless steel or vibrant Fraganite colour.

The Mythos sink range

Here is an overview of all the Mythos sinks. Our full product range includes numerous sinks, accessories, taps and more besides. For more details please see our brochures or visit www.franke.co.uk

MYTHOS

Perfection rests on the quality of the design as a whole

Franke Mythos is an exclusive range of sinks, each one of them distinguished by innovative design and unrivalled functionality. In the quest for the pinnacle of perfection, this range is also a tribute to a legendary paragon of excellence – the Alinghi.

Minimalist lines, carefully considered ergonomics and uncompromising technical precision all combine to make Franke Mythos sinks the standard of perfection in terms of visual and functional appeal.

Discover the spirit of Franke Mythos – created for people who share a passion for first-class performance and a sense of lifestyle.

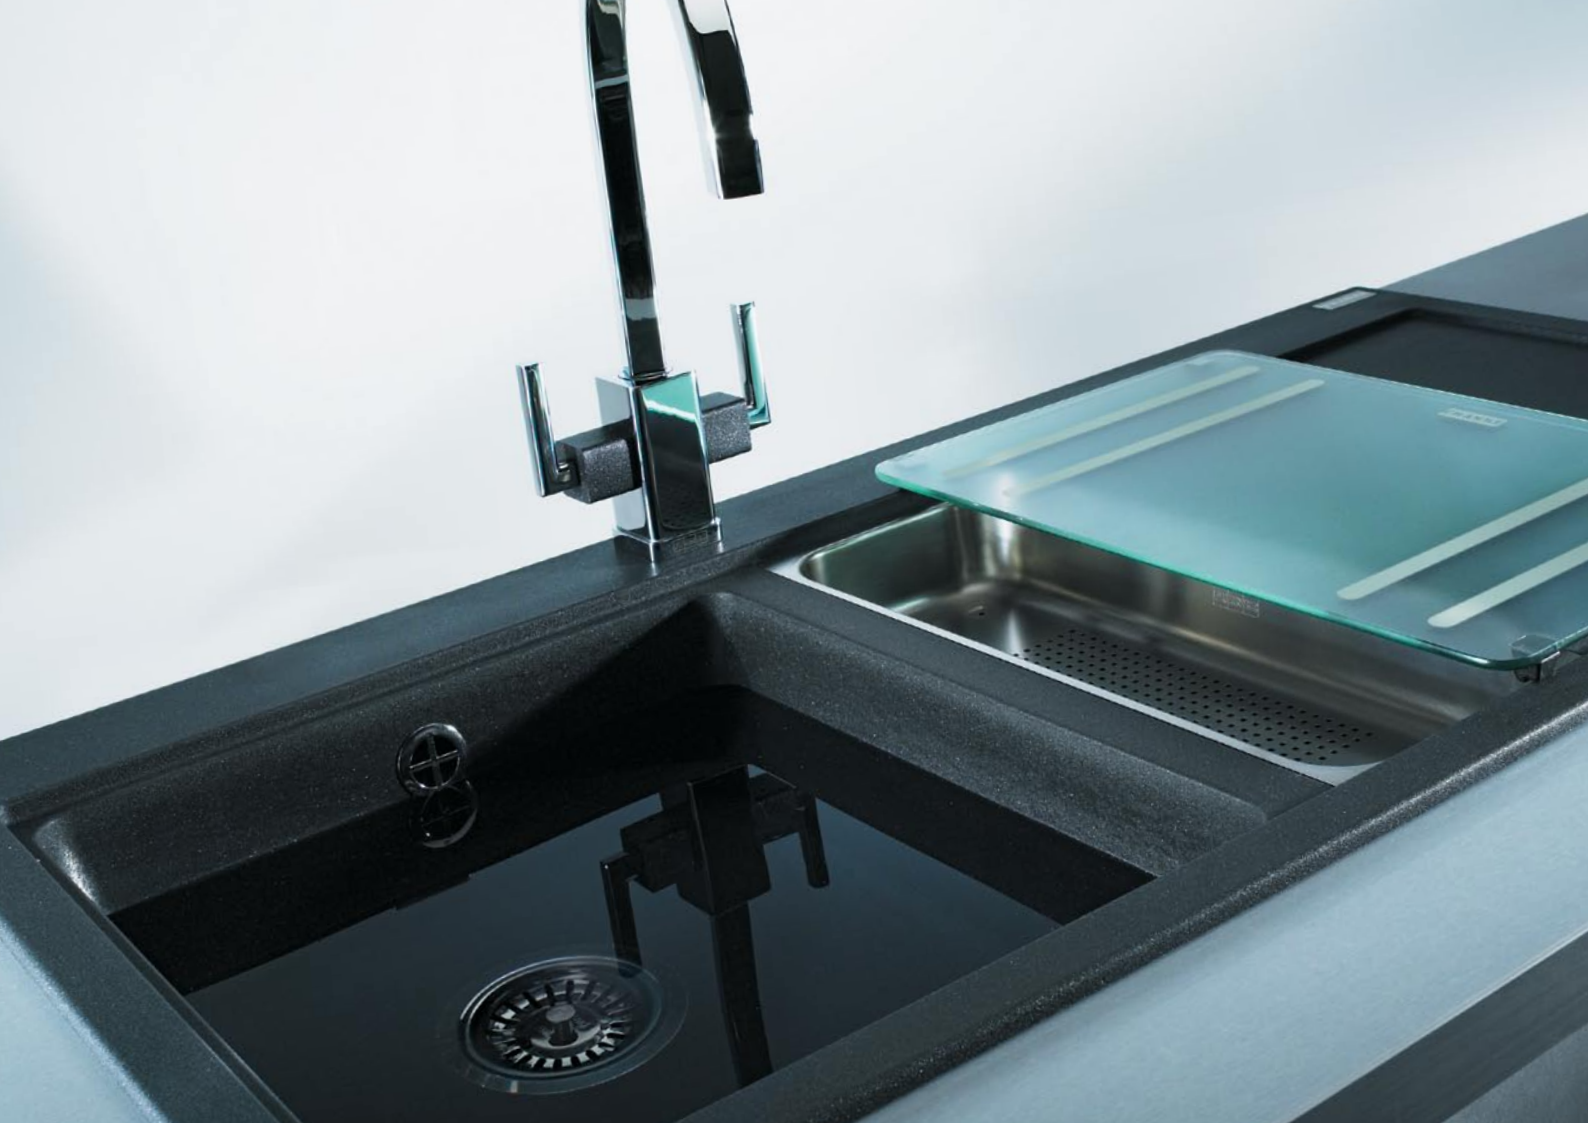

There is no one way of interpreting beauty – there are hundreds

Franke Mythos sinks go hand in hand with a range of perfectly coordinated accessories designed to ensure flowing movements and optimum ergonomic sequences: For example, the versatile preparation board in toughened glass uses the space available to best effect by sliding across the entire sink surface allowing use of the levels immediately underneath.

The strainer bowl and tap unit faithfully reflect the Franke Mythos design, rounding off the sinks and transforming each one into a fully functioning system.

Simplicity is the hallmark of true stature

Distinctly minimalist, Franke Mythos sinks follow the current trend in kitchen architecture towards straight lines. Their purist styling and formal clarity are underlined by corner radii of just 25 millimetres.

In traditional stainless steel or Fraganite in two exciting colours – Franke Mythos leads the way in terms of functionality and design.
