Our Principles for Environmental Protection

Our Responsibility

In addition to our commercial and social obligations, we consider it our responsibility to look after the environment.

Our Standards

We respect the legal requirements and strive throughout our business to achieve higher levels of environmental protection.

Our Role in the Material Cycle

We take into account the entire product life cycle, from its development stage to eventual disposal. Consumption of raw materials, energy, water and other products is kept as low as possible.

Our Waste Disposal Policy

We attach great importance to environmentally responsible disposal of waste materials and operate according to the principle of «Avoidance/Reduction/Recycling/Disposal».

Our Partners

We work together with our customers, suppliers, authorities and insurers to evaluate the risk posed to people and the environment by our products and production processes and adopt preventative measures.

Accountability at Every Level

Each member of the workforce is responsible for protection of the environment within the framework of their specific tasks. They receive regular information and instruction on safety and environmental protection measures.

Open Dialogue

A local environmental protection officer is appointed in all Franke production locations, whose advice and technical expertise in this area is sought during decision-making processes. A group environmental protection officer coordinates and monitors all environmental protection measures within the Franke Group.

Global Application

These principles apply to all Franke companies.

Eco Recycling products Sorters, Bins and Soap Dispenser

The Franke Sorter 700

In order to encourage households to sort and recycle kitchen waste, we have introduced a unique and brilliantly effective waste management system – the Franke Sorter 700, which is available for 500mm or 600mm wide cabinets.

A foot-activated Kickmatic kick-pedal or easy-to-use hand-operated Blum Motion system activates a roll-out carrier containing four separate bins, enabling the user to sort out domestic waste into different categories such as food, cans, plastic and paper, so that it can be systematically disposed of or recycled. Each bin has a handle that can also be used to secure waste bags.

The roll-out carrier is fully waterproof, simple to dismantle and easy to clean.

The new Franke Sorter 700 K 60/M 60 The new Franke Sorter 700 K 45/M 45

For cabinets from 600mm **Article No.** **£ inc. VAT**

Sorter 700 K 60 KickMatic

Colours shown are for reference only.

All sinks available with left or right drainer. The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required e.g. EUX 621 left hand drainer or EUX 621 right hand drainer. All bowl sizes and dimensions are described in mm.

Franke sinks are guaranteed for 25 years against manufacturing defect. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings and finishes, and 5 years in relation to moving parts. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate,

provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights.

Prices shown are UK mainland prices effective from April 2005 and include VAT at the current rate of 17.5%.

This literature has been produced on chlorine free materials harvested from sustainable forests.

The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice.
